

DO NOT **SINK** YOUR GREASE

GREASE CONGEALS AND STICKS IN THE SEWER SYSTEM CAUSING BACK UPS AND FLOODING.

WHAT YOU CAN DO INSTEAD

- ✓ Use screens over drains.
- ✓ Clean and maintain the grease trap often.
- ✓ Wipe grease and food scraps out of dishes and pots and put into compost.
- ✓ Pour grease and oil into containers and dispose of in your waste once cooled.

⊘ Don't use emulsifiers, chemicals, hot water, or other agents to dissolve grease. (They wear off in the sewer system and still make a greasy mess.)
